From observations made at Tutow airfield during the period 12 March to 1 May 1955, it was ascertained that the installation was not yet occupied by an air unit. The detail which had arrived in mid-February had dismantled the temporary building which it had occupied and had left the field. Since 22 or 23 April, a small VP detail wearing blue service color has been stationed at the field and charged with guarding the installation. Since that time, the field has also been off limits to all unauthorized persons. The previous commanding officer and the interpreter were transferred to Querfurt between 17 and 23 April. On 5 May, all of the workers there were employed in cleaning the runway and taxiway. All remaining work was scheduled to be completed by 15 May.

25X1

Comment. Construction work at Tutow airfield is completed and the field is expected to be occupied soon.
